

country	Main sources of water in your region	Average consumption of water at home (per home)	Average consumption of water at school (per month)	What are the problems connected with water usage in your area? How do you solve them?	What causes water pollution in your area?	What is the quality of water in your area? How does it influence the environment?	Tips for saving water consumption
Poland	Our region is located in the central part of Poland on the Vistula, Brda, Drwęca and Noteć rivers – the main sources of water.	4 cubic metres per month	51 cubic metres per month	The main problem is a low level of groundwater which has an impact on a landscape and flora.	The fields overfertilization causes runoff from the fields the fertilizers such as: nitrogen, phosphorus etc., which has a detrimental effect on lakes and rivers condition and causes severe pollution of the water bodies. Consequently water is overgrown with algae.	Water in Inowrocław is within the limits of what's normal and meet the health requirements. Our water isn't poisonous but on the other hand it isn't spring water as well. In some places water contains too much iron and it is too hard. There is no influence on the environment.	<ol style="list-style-type: none"> <li>1. Take a shower instead of having a bath.</li> <li>2. Turn off the tap while brushing your teeth and shaving.</li> <li>3. Change a gaskets in a leaking tap or toilet cistern.</li> <li>4. Replace a rubber washer in a leaky faucet or a leaky toilet cistern.</li> <li>5. Do washing in a washing machine only with a full drum.</li> <li>6. Use a dishwasher instead of washing up under running water.</li> <li>7. Save water with a two stage flush toilet.( Use a dual flush toilets).</li> <li>8. Turn off a tap properly.</li> </ol>

							<p>9. Water the garden plants with rainwater.</p> <p>10. Clean your car in a car wash instead of washing near a house.</p> <p>11. Check a water system, whether it is leakage or not.</p> <p>12. Defrost the food using a microwave or leaving in a fridge over night instead of defrosting under running water.</p> <p>13. Insulate the pipes from a waste of water while heating.</p> <p>14. Water the lawns economically, preferably early mornings in order to prevent the ground steaming.</p> <p>15. Use only economical sprinkles.</p> <p>16. Use a brush instead of a garden hose for cleaning</p>
